## Occupational Therapy: Mobility Aids

### Wheelie Walker
- Helps you to move about safely inside and outside the home
- Has an in-built shopping basket & seat
- The seat can be used as a tray to carry small items
- Can be folded up to fit into a small car boot

**Height of handles:**

### Manual Wheelchair
- Light-weight options available that can be folded and placed in boot of car
- Multiple accessories available
  - **Self-propelled:** large wheels that user pushes
  - **Attendant-Propelled (Transit chair)** — smaller rear wheels, requires carer to push and steer.

### Portable Ramp
- Allows you to turn a low step into a ramp for people in wheelchairs or using wheelie walkers
- Folds up for easy storage
- Different lengths of ramps are available depending on the height of the step

### Threshold Ramp
- Allows use of wheelie walkers/wheelchairs over small thresholds e.g. Change in floor height/door jam
- Different heights of ramps are available

**Note:** Please check the person’s weight is not more than the maximum load limit for the item chosen.
